

[E] LIQUID_eKYC_010_GetPhotosAPI_v1.7.7

Revision history

- 2019/08/09 v1.0 Created
- 2020/04/22 v1.1 Update format of API Document
 - 2020/04/22 v1.2 Added features for driving history certificate
- 2020/06/15 v1.3 Added features for passport
- 2020/09/14 v1.4
 - Removed redundant sections from Specification. Formatted sample response data
 - Added a section on which photo will be masked automatically and manually for passports
 - Changed the time when the masked image will be available from 1 hour to 10 minutes after registration
- 2020/12/02 v1.5
 - Added features for individual number document collection
 - Changed value type descriptions from Japanese to English
- 2021/01/10 v1.6 Comply to "To", Comply to "Chi" (Added health insurance card)
- 2021/07/05 v1.7.0 Added completion status for masking
 - Added response param: "Masking in progress"
 - Added data size information for PC photoshoots
- 2021/08/05 v1.7.1 Added General Document Application and Public Certification, reorganized My Number Collection features
 - Added error code: ID document with no response value (CE00019)
- 2021/11/17 v1.7.2 Added information about restrictions
- 2022/1/19 v1.7.3 Added comply to "To"/"Chi" (IC Scan through SDK)
- 2022/02/22 v1.7.4 Added supplemental explanation to specifications
- 2023/01/24 v1.7.5 Added additional explanation for image size
- 2023/10/24 v1.7.6 Revised incorrect character limit for the ID document code in the response item.
- 2024/10/01 v1.7.7 Changed so that images are returned even when the status is "Waiting for the 1st operation (application information is being imported)"

Overview

- This API returns images of the latest KYC application represented by designated Applicant ID

Specification

- Photos of ID documents has been trimmed by shooting frame
 - Image specification
 - Data size /image:
 - Smartphone : Max 1MB
 - PC : Max 2MB
 - ex.)
 - When using the Comply to "Ho" (front side image + thickness image + back side image + appearance image)
 - Smartphone shooting : 4MB
 - PC shooting : 8MB
 - When using the Comply to "To/Chi" (front side image + thickness image + back side image)

- Smartphone shooting : 3MB
 - PC shooting : 6MB
- Data format: JPG
- Data encryption: N/A
- Masked image will be available 10 minutes after registering KYC result using "Register KYC Result API"
 - "Registering KYC result" indicates the following states.
 - KYC is completed using Manager
 - The request of "Register KYC Result API" has succeeded
- Masking settings for photos
 - When using Manager: The masking settings are preset by ID document type
 - When not using Manager: The photos that have been specified to contain sensitive information in the "Register KYC Result API"
- The settings for is_masked
 - When using Manager: Set to true after KYC is completed and after the area specified by Manager is masked.
 - When not using Manager: Set to true when "Register KYC Result API" indicates sensitive information and the masking is done.
- For organizations who are not using Manager: When you find an image that should be registered as containing sensitive information but is_masked=false, please fetch the image again after some time.
- For information on which photo will get masked, please refer to LIQUID_eKYC_010_GetPhotosAPI (attached material)
- The system records the date and time when the image was retrieved.
 - When the same image is retrieved again, the date and time of retrieval is updated.
 - The date and time is managed by request and not by Applicant ID
- If the request was sent to an Applicant ID that does not belong to KYC Application, will return "Applicant ID is not found" (CE00001)
- If the request was sent to one of the following an Applicant ID, will return "ID document with no response value" (CE00019)
 - Comply to "Wa"
 - Driver's license and Individual number card which comply to "To" (IC Scan through SDK).
 - Driver's license and Individual number card which comply to "Chi" (IC Scan through SDK).
- Refer to "LIQUID_eKYC_G11_Apendix_画像データ取得API (GetPhotosAPI) " for the types of images that can be retrieved by ID Document type code and whether or not there are errors.
- Return images after completion of the KYC application

Restrictions

- Max 100 requests/minute
- Immediate modifications to the database may not be reflected, so the response may include old data or the request might result in an error. In this case please repeat the request after an interval
- Calling this API immediately after the application is completed with eKYC Applicant may result in an error. Make sure to call after a 1 second interval with several retries.
- ~~For SDK~~
 - ~~Calling this API immediately after 016_RegisterApplicationInfoAPI may result in an error. Make sure to call after a 1 second interval with several retries~~
- ~~For Web (pre-application)~~
 - ~~Calling this API immediately after the application is completed with eKYC Applicant may result in an error. Make sure to call after a 1 second interval with several retries~~
- ~~For Web (post-application)~~
 - ~~Calling this API immediately after 016_RegisterApplicationInfoAPI may result in an error. Make sure to call after a 1 second interval with several retries~~

Error cases

- Applicant ID is not found (CE00001)
- Newest application of designated Applicant ID, is still not completed yet, or is expired (CE00005)
- ID document with no response value (CE00019)
- System Error

API Specification

- URL
 - Staging: https://(Unique URL for each organization)/v1/applicants/:applicant_id/photos
 - Production: https://(Unique URL for each organization)/v1/applicants/:applicant_id/photos
- Protocol: https
- Method: GET
- Request: PATH Parameter
- Response: JSON
