

[E] LIQUID_eKYC_016_RegisterApplicationInfoAPI_v1.3.2

Revision history

- 2020/04/24 v0.1 Created
- 2020/09/14 v1.0 Removed redundant sections from Specification
- 2020/12/02 v1.1
 - Changed value type descriptions from Japanese to English
- 2021/08/05 v1.2.0 Added features for Public Certification Service for Individuals
- 08/30/2021 v1.2.1 Made minor correction
- 2021/11/17 v1.2.2 Added information about restrictions
- 2021/12/14 v1.2.3 Added Comply to "To/Chi" (IC Scan through SDK) and added comply to "Ho" to status transition table
- 2022/05/23 v1.2.4 Added new ID document number to request
- 2022/07/26 v1.2.5 Added "Front"
- 2022/09/27 v1.2.6
 - Added request param : Middle name
 - Added request param : Middle name(kana)
 - Changed request param Last Name to an optional param
 - Changed value type of postcode in request param
- 2023/03/28 v1.2.7 Added Comply to "FrontBack"
- 2023/06/27 v1.2.8
 - Added request param : Additional application information
- 2023/10/24 v1.2.9 Added "Wa"+"Face"(Face JPKI)
- 2024/03/26 v1.3.0 Added request param: resident status, stay period, stay expire date, permitted date, permission type, employment restriction, issue date
- 2025/05/01 v1.3.1 Additional selectable values have been added for the Nationality field in the request parameters.
- 2025/10/10 v1.3.2 Added a description for the Comply to "Ru" method in the Specification

Overview

- Register application information (name, address and so on) to newest application of designated Applicant ID.

Specification

- When the request to this API succeeds, it changes the KYC status as below.

Device	Using Manager	ID document	Auto verification result	KYC status changed to
WEB/PC	–	–	–	Waiting for 1st operation *Except when the Auto-eKYC processing option is applied.
SDK	Using Manager	"Ho" "To"/"Chi" (Photoshoot through SDK) "Front" "FrontBack"	–	Waiting for 1st operation *Except when the Auto-eKYC processing option is applied.
		"He" "To"/"Chi"	OK	Completed OK
		(Photoshoot through SDK)	NG	Waiting for 1st operation

		"Wa"	–	Completed OK
		"Wa" + "Face" (Face JPKI)	OK	Completed OK
			NG	Waiting for 1st operation
		"Ru"	–	Completed OK
		"Ru" + Face	OK	Completed OK
			NG	Waiting for 1st operation
	Not using Manager	–	–	Waiting for 1st operation

- When an application is completed on Applicant, this API must receive a request within 3 days of the completion date. If it does not receive a request, the application will become expired.
- Only organizations whose application information is registered as "application info after KYC" can send the request (this is the same for both WEB and SDK)
 - Organizations that are not registered as "application info after KYC" will be returned the error "The application information cannot be registered to the Applicant ID (CE00018)"
- When the KYC status of the newest application is anything other than "Before KYC operation (importing application info)", the request returns an error corresponding to the current status
- If the request was sent to an Applicant ID that does not belong to KYC Application, will return "Applicant ID is not found" (CE00001)

Restrictions

- Max 100 requests/minute
- May not be used in parallel with 001_ApplyAPI or 002_Re-applyAPI
- Immediate modifications to the database may not be reflected, so the response may include old data or the request might result in an error. In this case please repeat the request after an interval
- For SDK
 - Calling this API immediately after executing the Activate Function may result in an error. Make sure to call after a 1 second interval with several retries
- For Web (pre-application)
 - No additional specifications

- For Web (post-application)
 - Calling thi API immediately after the application is completed with eKYC Applicant may result in an error. Make sure to call after a 1 second interval with several retries

Error cases

- Applicant ID is not found (CE00001)
- Newest application of designated Applicant ID, is still not completed yet or KYC operation has not been completed yet (CE00004)
- Newest application of designated Applicant ID, is completed and KYC result is already registered (CE00006)
- The KYC application is not completed yet (CE00008)
- The KYC application has expired (the URL has expired) (CE00011)
- The application information cannot be registered to the Applicant ID (CE00018)
- System Error

API Specification

- URL
 - Staging: https://(Unique URL for each organization)/v1/kyc_request_informations
 - Production: https://(Unique URL for each organization)/v1/kyc_request_informations
- Protocol: https
 - Method: POST
- Request: JSON
- Response: JSON

1	API Key	Refer to Common Spec.				○	Refer to Common Spec.	

Body

	論理名 (Logical Name)			物理名 (Physical Name)	JSONデータ型 (JSON Data Type)	データ属性 (Value Type)	文字数上限 (Character Limit)	必須 (Required?)	フォーマット (Format)	説明 (Description)
1	Applicant ID			Refer to Common Spec.				○	Refer to Common Spec.	
2	Last Name			last_name	string	Any	150			Please refer to *2 below if applicant has middle name
3	First Name			first_name	string	Any	150	○		Please refer to *2 below if applicant has middle name
4	Middle name			middle_name	string	Any	150			
5	Last name (Katakana)			last_name_kana	string	Any	150			
6	First name (Katakana)			first_name_kana	string	Any	150			
7	Middle name(katakana)			middle_name_kana	string	Any	150			

8	Birthday			birthday	string	Date	8	o	yyy yM Md d	API returns “System Error” when a date before 1/1/1900 or a date which doesn’t exist is supplied.
9	Nationality			nationality	string	Alphanumeric (Half-width)	2			ISO 3166-1 alpha-2, and the following values are now supported: • 01: Republic of Kosovo • 99: Stateless
10	Sex			sex	string	Number	1			<< Please refer to Generic codes table>>
11	Zip code			zip_code	string	Alphanumeric (Half-width)	9			2~9 alphanumeric characters
12	Phone Number			phone_number	string	Number	11			10 or 11 digit without hyphen
13	Address1			address 1	string	Any	300	o		If address is divided to multiple form in your system, insert 1st part of it (ex. Prefecture) here. Otherwise, insert all address to here. (*1)
14	Address2			address 2	string	Any	100			If address is divided to multiple form in your

									system, insert 2nd part of it (ex. City) here. (*1)
15	Address3			address 3	string	Any	100		If address is divided to multiple form in your system, insert 3rd part of it (ex. Street) here. (*1)
16	Address4			address 4	string	Any	100		If address is divided to multiple form in your system, insert 4th part of it (ex. Building name) here. (*1)
17	ID document number			id_number	string	Alphanumeric (Half-width)	100		Specify when using the Auto-eKYC processing option (AI verification) to match ID document numbers. Driver's license: Assumed numbers only Residence card: Assumed alphanumeric Passport: Assumed alphanumeric *The above is an assumption, and no error control is applied for each character type
18	Resident status			resident_status	string	Any	100		Only for residence cards
19	Stay period			stay_period	string	Any	100		Only for residence cards Assumption based on only one of the following formats

										• Y year M month • Y year • M month *The above is an assumption, and no error control is applied.
20	Stay expire date			stay_ex pire_dat e	strin g	Date	8		yyy yM Md d	Only for residence cards
21	Permitted date			permitted_date	string	Date	8		yyy yM Md d	Only for residence cards
22	Permission type			kind_of_ permission	string	Any	100			Only for residence cards Assume only one of the following • Landing Permit • Permanent Residence • Extension of Period of Stay • Change of Status of Residence • Special Permission to Stay *The above is an assumption, and no error control is applied.
23	Employment restriction			employment_restriction	string	Any	100			Only for residence cards Assume only one of the following

										• No work restrictions • Only work activities based on the status of residence are permitted • Only work activities based on the status of residence at the designated organisation is permitted. • Only work activities instructed by the letter of designation are permitted. • Restricted work The above is an assumption, and no error control is applied.
24	Issue date			issue_date	string	Date	8		yyyymmdd	Only for residence cards
25	Additional request informations			additional_kyc_request_informations	Array					A parameter that allows registration of any additional application information. The registered additional application information is displayed on the Manager's review screen, and the contents can be checked by comparing it with the document

									ticket. Up to 10 pieces can be specified.
26		Additional request label name		label	Array				Label name (e.g. University name, account number, etc.) Specify a string indicating what the additional application information is about.
27			language	language	string	Alphabet (Half-width)	2		ISO 639-1 Specify the language code. << Please refer to "APIGenericCode" >>
28			text	text	string	Any	100		Specify item names for each language.
29		Additional request value		value	string	Any	100		Specify a string representing the content of the additional application information (e.g. . University of Tokyo, 012345678).
30		ID document type array		id_document_types	Array				Specify the document code for which additional application information can be checked on the eKYC Manager's verification screen.

Additional application information is not uniformly displayed for all applications, but only on the verification screen of the application data for the specified document code (not on the verification screen for the document code not specified).

The document code can be either an identification document code or an additional document code (either one or both can be specified).
(Either one or both can be specified).

However, it is mandatory to specify at least one code, either the identification document code sequence or the additional document code sequence.

When specified by each code, the following screens will be displayed ID document code: ID document surface confirmation screen

										Additional document code: Additional document confirmation screen"
31		ID document type code		(Array element)	string	Number	5			
32		Additional document code array		optional _document_types	Array					Specify an additional document code to which additional application information can be verified. At least one code must be specified in the ID document code sequence or the additional document code sequence.
33		Additional document code		(Array element)	string	Alphanumeric (Half-width)	6			

*1: These attributes are connected while divided by full width space, when eKYC Manager displays address information, for KYC operation.

*2: eKYC Manager shows name ordered by last name ⇒ first name. If you want to add middle name, we recommend to add it after last name as “Last name + Middle name” or before first

name as “Middle name + First name”. Also, please add half width space between Last name and Middle name (or Middle name and First name) for visibility.。
