

[E]LIQUID_eKYC_901_DeleteUserDataAPI_v1.3.9

Revision history

- 2020/04/22 v1.0 Created
- 2020/10/23 v1.1 Made correction: Corrected the HTTP Status Code for success from 204 to 200
- 2020/12/02 v1.2
 - Added features for individual number document collection
 - Changed value type descriptions from Japanese to English
- 2021/02/05 v1.3
 - Made minor correction
- 2021/08/05 v1.3.1 Added General Document Application and Public Certification, reorganized My Number Collection features
- 2021/11/11 v1.3.2
 - Added error codes for the SDK trial version
- 2021/11/17 v1.3.3 Added information about restrictions
- 2022/02/22 v1.4 Added error codes for Shield and AML processing which are incomplete.
- 2022/10/25 v1.3.5 Deleted error code CE00024 and CE00025
- 2022/11/22 v1.3.6 Description of Get Additional Document Photo API
- 2025/02/01 v1.3.7 Corrected specification description
- 2025/06/23 v1.3.8 Addition of limitations
 - Error code “CE0004” is returned depending on the timing when using the fraud detection service
- 2025/10/10 v1.3.9 Added a description for the Comply to "Ru" method to the example of ID document codes in the specification's insertion table

Restrictions

- **Please call this API at least one second after calling "GetPhotosAPI" or "Register KYC Result API".**
- The API may fail when it is called immediately after "GetPhotosAPI" or "Register KYC Result API".

Overview

- Deletes sensitive data specified by the Applicant ID of KYC Application
- We replace a sensitive info into a dummy image file or dummy string data.
- Images containing sensitive information will be replaced by a dummy image, and sensitive information inside the DB will be replaced by a dummy string.

Specification

- Runs the processes below for the newest application of the designated Applicant ID. The process will depend on the KYC status.
 - When the application is not complete (Application incomplete)
 - Returns error "The KYC application is not completed yet" (CE00008)
 - When the KYC operation is in progress (application complete, Waiting for 1st operation , Waiting for 2nd operation, Waiting for SV to respond, etc.)
 - KYC operation is not complete (CE00004)
 - When the URL has expired (Expired)
 - Delete sensitive information of all historical applications
 - This deletes historical data regardless of its image data collection status or KYC status
 - When the KYC is complete (can be OK or NG)
 - Processing differs depending on the identification document code in the latest application, whether or not the image is acquired with the GetPhotosAPI, and whether or not the image is acquired with the AdditionalDocumentShootingOptionsAPI if the additional document option is used

ID document code	When the Additional document option is used	Get Photos API	Additional Document Shooting Options API	Specification
ID document code for which an image to be acquired exists	X	Not acquired	-	The photo collection is not done (CE00007)

Ex. Comply to “Ho,” Comply to “He,” the "front and back" methods etc.		Acquire d	-	• Delete confidential data for all applications, including past applications • Delete without taking into account whether or not images were acquired for previous applications
	○	Not acquire d	-	The photo collection is not done (CE00007)
		-	Not acquired	The photo collection is not done (CE00007)
		Acquire d	Acquired	• Delete confidential data for all applications, including past applications • Delete without taking into account whether or not images were acquired for previous applications
ID document codes for which an image to be acquired does not exist Ex. Comply to “Wa”, “Ru” method etc.	X	(Not required to be acquire d)	(Not required to be acquired)	• Delete confidential data for all applications, including past applications • Delete without taking into account whether or not images were acquired for previous applications
	○	(Not required to be acquire d)	Not acquired	The photo collection is not done (CE00007)
		(Not required	Acquired	• Delete confidential data for all applications, including past

		to be acquire d)		applications • Delete without taking into account whether or not images were acquired for previous applications
--	--	------------------------	--	---

- When the newest application of the designated Applicant ID is already deleted, it will not cause an error. The date and time when the application was deleted is returned, and no more data will be deleted
- When the deletion is completed, the deletion status and the date and time of deletion is managed by application
- If an error occurs during the deletion process, the process will stop even though part of the data still remains. This half-deleted record will be managed as a record that has not been deleted yet
- If the request was sent to an Applicant ID that does not belong to KYC Application, will return "Applicant ID is not found" (CE00001)
- When using the SDK trial version, calling this API will result in "APIs that cannot be used due to business settings" (CE00023).

Restrictions

- Max 10 requests/minute
- 901_DeleteUserDataAPI's average response time is 5 seconds, but it may take up to 30 seconds
- Immediate modifications to the database may not be reflected, so the response may include old data or the request might result in an error. In this case please repeat the request after an interval
- Please call this API at least 1 second after calling 010_GetPhotosAPI, 023_Get Additional Document Photo API or 014_RegisterKYCResultAPI
- Depending on the timing, calling this API may result in an error. Make sure to call after a 1 second interval with several retries
- If using the following 4 detections from the Fraud Detection Service and the Register Application Info API is called immediately after it has been executed, the error code "CE0004" may be returned, depending on the timing. Please wait a little while and request again.
 - Face Reuse Detection

- Personally Identifiable Information Reuse Detection
- Warning List (personally identifiable information) Detection
- Warning List (face) Detection

Data to be deleted

- For details, refer to "Data to be deleted"

Error cases

- APIs that cannot be used due to business settings (CE00023)
- Applicant ID is not found (CE00001)
- Newest application of designated Applicant ID, is still not completed yet or KYC operation has not been completed yet (CE00004)
- The photo collection is not done (CE00007)
- The KYC application is not completed yet (CE00008)
- Error codes for Shield processing incomplete (CE00024)
- Error codes for AML processing incomplete (CE00025)
- System error

API Specification

- URL
 - Staging: https://(Unique URL for each organization)/v1/applicants/:applicant_id/sensitive_info
 - Production: https://(Unique URL for each organization)/v1/applicants/:applicant_id/sensitive_info
- Protocol: https
- Method: DELETE
- Request: PATH Parameter
- Response: JSON
